Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Applicators having beeswax and an anionic emulsifier as the emulsifier system.
- Applicators having non-ionic emulsifier as the emulsifier system.

Specifically, claims 1-11, 20, 21, 24, 26, 28, 28, 30, 32, 34, 35, 38-39, 42-44, 48-56, 59-63, 66-70, 73-76, are drawn to flexible applicators comprising allantoin, and an emulsifier system including beeswax and anionic emulsifiers that are substantially hydrophilic and are soluble in water, classified in class 424, subclass 402 or subclass 70.22. However, claims 12-19, 22, 23, 25, 27, 29, 31, 33, 36-37, 40, 41, 45-47, 57-58, 64-65, 71-72, are drawn to flexible applicators comprising allantoin, and emollient system and an emulsifier system comprising non-ionic emulsifiers, classified in class 424, subclass 443+ or subclass 70.31.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1, 12, 14 are generic. Further none of the dependent claims employ a combination of beeswax, anionic emulsifier and non-ionic emulsifier. Accordingly, the species mentioned above are viewed to be patentably distinct and not related in a combination-subcombination fashion.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1617

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made Celine Crowson on February 10, 03 to request an oral election to the above restriction requirement, but did not result in an election being made.
